Radiator grilles for BMW

Product benefits

What are the “kidneys” in the BMW vehicles?

The two BMW kidney-shaped radiator grilles, located at the front of the vehicle, perform an aesthetic function and are crucial for engine ventilation and system cooling, ensuring optimal operation of components.

The BMW grills, due to their structure, can be divided into three main styling groups:

THE SINGLE RIB

The SKV single rib “kidneys”, known from BMW cars, are a classic in themselves - they are referred to as the “Bavarian” style. Thanks to the use of high-quality paint coatings, they look elegant.

THE DOUBLE RIB, aka the “M look”

The SKV double-ribbed grille is a perfect complement to the stylish and aggressive aesthetics of BMW M-series models. Their unique design exhibits double ribs adhering to the “M look style”, emphasizing the vehicle’s dynamics and giving a sporty look.

THE DIAMOND

The BMW DIAMOND grill owes its name to the diamond-shaped ventilation holes. Its modern and unique style fits perfectly with the line of Bavarian cars, both in pre-facelift and post-facelift versions.

What characterizes our BMW Kidneys:

OVER
400
MODELS

A wide offer of
over 400 models

Made of materials

↓ ↓ ↓

Category number Manufacturer code Product number

The radiator grilles indexes of SKV start from number 001 in group 66.

Reasons for replacing a grille in your car:

- 1. Mechanical damage:**
Most often caused by physical damage, such as cracks, fractures or chips, which may be due to road collisions.
- 2. Modernization/upgrade:**
Changing the aesthetics or style of your vehicle may stem from a desire to personalize your car or improve its appearance to suit your individual preferences.
- 3. Corrosion:**
Most often caused by long-term exposure to weather conditions, road salt or UV radiation, leading to damage to the paint coating and general performance / technical qualities.

Radiator grilles for BMW

Structure/color schemes/ finishes

COLOR SCHEMES/ FINISHES OF SKV GRILLES (KIDNEYS):

Black matte

The use of an SKV grill with a matte paint coating gives the car a unique character. Using matte elements during dechroming is virtually a necessity.

Black gloss

The deep, glossy black, often called the Piano Black, gives our grilles an elegant yet modern look. This detail, so characteristic of the BMW brand, thanks to its intense colour, fits perfectly with the timeless chassis line of the car, adding a unique character and prestige to it.

Carbon

Car accessories resembling carbon fibre composites are extremely popular among tuning fans. The carbon effect is achieved by applying hydrographics and securing it with high-gloss varnish

Chrome

Chromed elements are associated with prestige. The high quality of chrome used in SKV kidneys gives a mirror effect and does not let anyone pass by your BMW indifferently.

The SKV brand kidneys are made of ABS material,

which guarantees their durability, flexibility and ease of processing. Additionally, this material is light, highly aesthetic and pleasant to look at.

Easy assembly

Thanks to the mounting clips, the installation process is snappy and hassle-free, meaning users can enjoy a new, stably mounted, and perfectly fitting grill.

Diversity of the offer

The SKV kidneys are characterized by versatility, fitting perfectly as a replacement of the original kidneys to all BMW series and body models. Regardless of whether the car is pre- or post-facelift, or has the "M style" package, the SKV kidneys guarantee perfect fit and pleasant aesthetics.

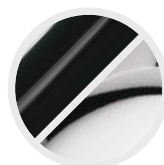

Decorative & finishing techniques

The SKV kidneys for the BMW cars are distinguished by their exceptional quality, thanks to the perfect application of the paint coating. Techniques such as hydrographics, chrome plating & superior varnishing are used in the production of the grill, yielding amazing results.

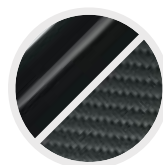

The SKV brand kidneys are also available in the following color/finish combinations:

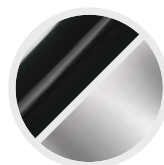

Black matte + chrome

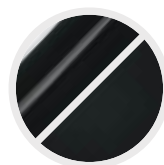

Black gloss + chrome

Black gloss + carbon

Black gloss + silver

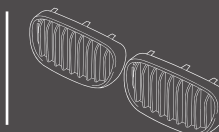

Black gloss + black matte

Radiator grilles for BMW

The packaging

A product securely & thoroughly packed.

The BMW kidneys offered by the SKV brand are packed separately in polyethylene foam bags, and separated by a spacer made of a thick EPE sponge. Each SKV-branded box contains a set of 2 kidneys.

The outer cardboard packaging for the SKV grilles

plays a protective role, constitutes the SKV brand identification system and enables safe storage, transport and distribution of the product. Additionally, it contains key information about the part, such as a barcode, part name, symbol and a hologram confirming genuinity.

The EPE foam spacer

is used to separate the kidneys from each other in a cardboard box, as it stiffens the products and prevents them from accidentally moving inside the packaging.

The bag

made of light and soft polyethylene foam, and protects not only against physical damage and scratches of the product during transport but also protects against moisture.

SKV brand strengths

About the SKV brand

30k⁺ Over 30,000 references

100⁺ Over 100 product groups

A dynamically growing brand

High stock levels with 96% availability

Quality backed by a minimum 3-year warranty

Over 500 new products monthly

Free marketing support

Wide range of products

Timely delivery of goods

Certified TecDoc data supplier

Leader in the domestic market

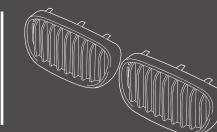

The success of the SKV brand is primarily due to the quality of its products at affordable prices. Production in the factories is systematically monitored by SKV employees.
